

Jira has a feedback button you can put into any web site:

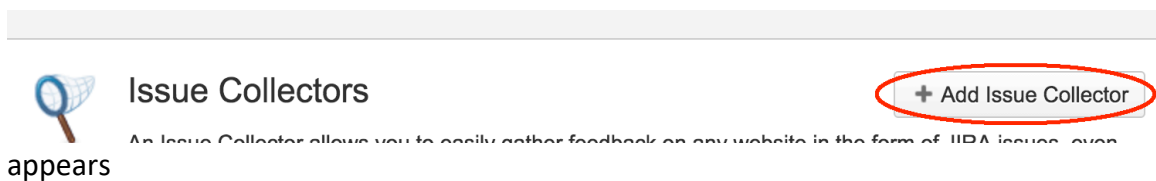

Clicking on the little Provide Feedback tab pops up this dialog for the user:

A screenshot of a feedback dialog box titled 'Got Feedback?'. It contains a message 'Please provide your feedback below:'. Below this is a row of radio buttons for rating the page: 'Rate this page' followed by 'Awesome!', 'Good', 'Meh!', 'Bad', and 'Horrible!'. Each has a corresponding emoji. Below the rating is a text input field for 'What do you like?'. Below that is another text input field for 'What needs to be improved?'. At the bottom left, there is an 'Attach file' section with a 'Choose Files' button and 'No file chosen' text. At the bottom right, there is a status bar showing the user is logged in as 'Susan Kraft Yorke' and a 'Submit' button next to a 'Close' link.

If you want this on a web page you manage, navigate Jira as an Administrator to:

1. **Jira>Project>System Admin Summary page**
2. Scroll to bottom of the page and open the Issue Collector option.

3. Click **Add Issue Collector**
4. Fill out the fields.
5. Add the code to any page you want feedback on.
